Version 04.24

Table of contents

Section 1:	iOS settings.....	1-2
Section 2:	Logging into LifeLoop with Face ID.....	3-4

iOS settings

Step 1

Go to settings.

Step 2

Select Face ID & Passcode. If asked, enter your passcode. If you didn't set a passcode, you'll be asked to create one to use as an alternate way to verify your identity.

Step 3

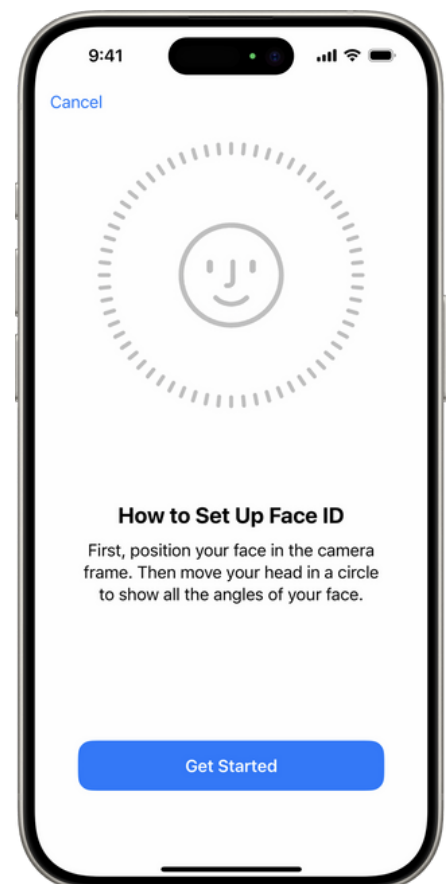

Select set up Face ID.

Step 4

Hold your device in portrait orientation, position your face in front of your device, then select **get started**.

Step 5

Position your face inside the frame and gently move your head to complete the circle. If you're unable to move your head, select accessibility options.

iOS settings

Step 6

When you finish the first Face ID scan, select continue.

Step 7

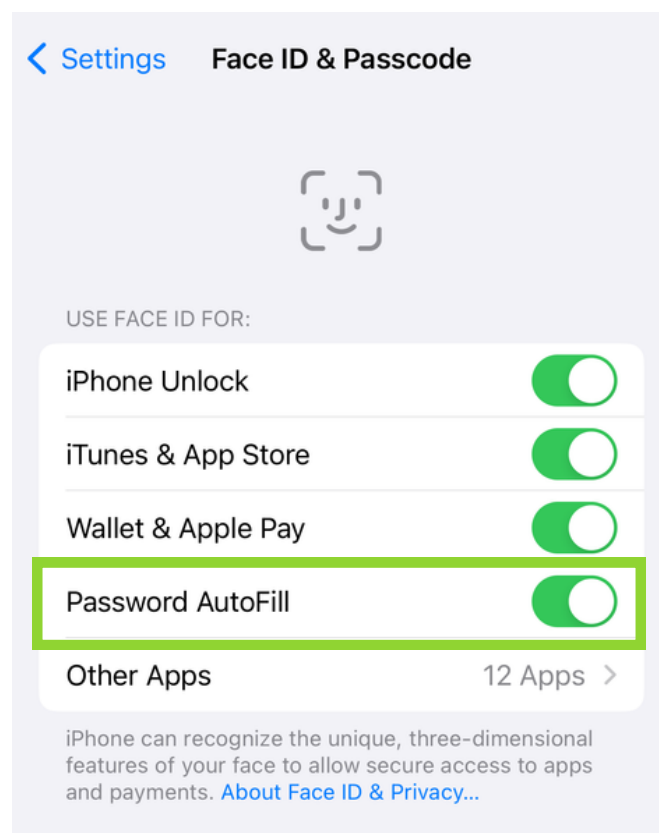

Gently move your head to complete the circle for a second time.

Step 8

Select done.

Step 9

Within the Face ID & Passcode settings, toggle password autofill to on.

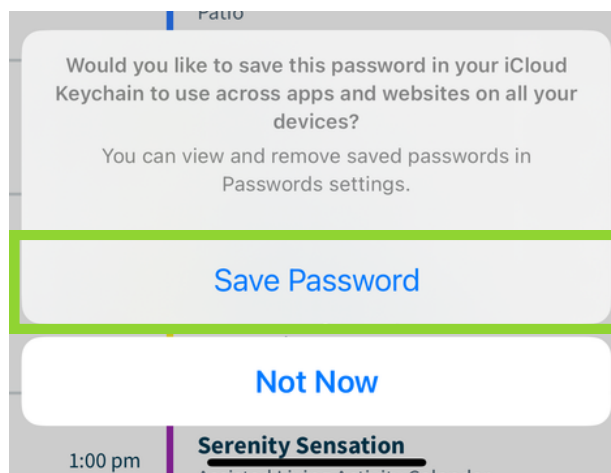

Logging into LifeLoop with Face ID

Step 1

Open the LifeLoop app. If the app has not been downloaded yet, please access the App Store, search LifeLoop and download.

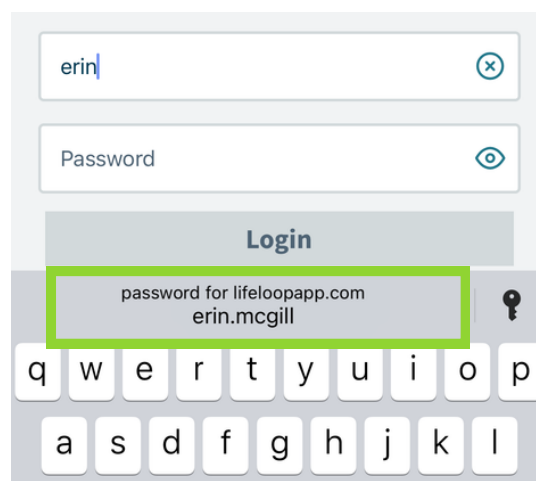

Step 2

The first time logging in on the mobile app, enter username and password and log in. Select save password.

Step 3

Once the password has been saved, type in the username for all future logins. The saved password will be available by selecting the saved username below.

Logging into LifeLoop with Face ID

Step 4

Face ID will then be enabled to access the password. Once Face ID is confirmed, a check mark will appear at the top and the password will appear.

Step 5

Select login.
