Version 03.24

Table of contents

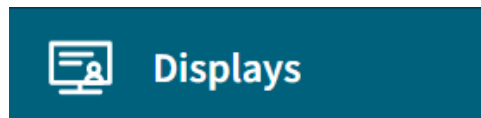

Section 1:	Adding a video to a display.....	1-6
Section 2:	Resources.....	7
Section 3:	Continued learning.....	8

Adding a video to a display

Step 1

Select displays on the bottom of the feature menu.

Step 2

Option 1

Select + new display on the top right-hand side of the screen and complete the create display form.

Option 2

Select a previously created display.

Adding a video to a display

Step 3

Select + Insert new content located under the main content section.

Main Content

No Main Content Selected

+ Insert New Content

Step 4

Select **video** from the content type options on the far right-hand side of the screen.

Insert Content

Select Content Type *(required)*

LifeLoop Designer Project

Use a Designer slideshow project

Google Slides

Use a published Google slides URL

Video

Use a video stream URL

Adding a video to a display

Step 5

Paste the URL from the video into the video URL box.

Video URL

Youtube URL of video...

Is Fullscreen

☐ Slide will be displayed in fullscreen

Note: All video sources must be public in order for the video to play on a display. For example, if the video is private on YouTube, it will need to be changed to public to be shared on a display.

Step 6

Utilize the checkbox to determine if the video will be displayed in fullscreen view.

Video URL

Youtube URL of video...

Is Fullscreen

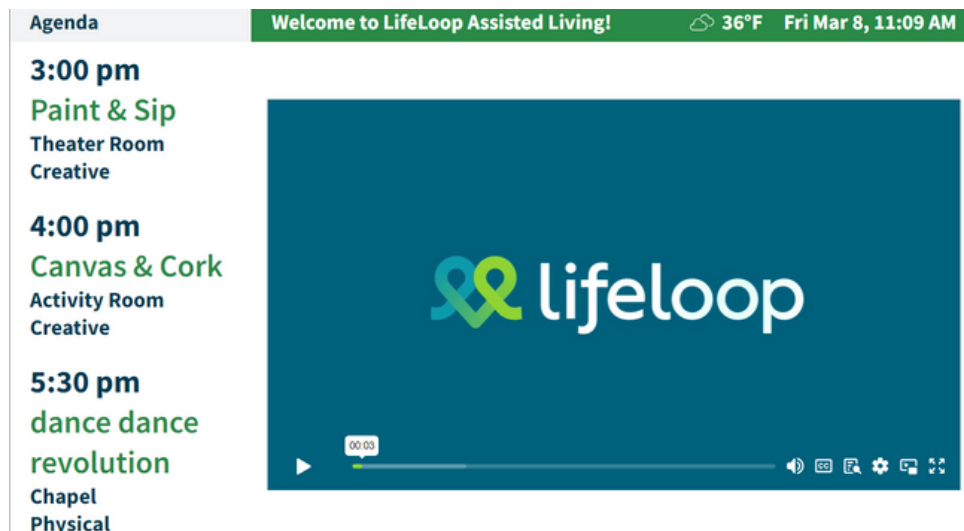

☐ Slide will be displayed in fullscreen

Step 6 (cont)

Example of default view:

Example of fullscreen view:

Adding a video to a display

Step 7

To setup a recurring pattern for a project, select **setup recurrence**. Recurring patterns provide the ability to schedule slideshows and videos on certain days of the week, once a month, the first Monday of the month etc. There is also an option to schedule a specific start and end time for the video to run.

The screenshot shows a 'Content Schedule' form with a green border. At the top is a 'Setup Recurrence' button. Below it is a 'Time Schedule' section containing 'Start Time' and 'EndTime' input fields. Two informational boxes with warning icons are at the bottom: the first states 'Start time and end time are optional. Default schedule plays all day.' and the second states 'Video slides are not supported on all devices. Learn More'.

Step 8

Once the recurring pattern and time schedule is set up, select **insert content** on the bottom right-hand side of the screen.

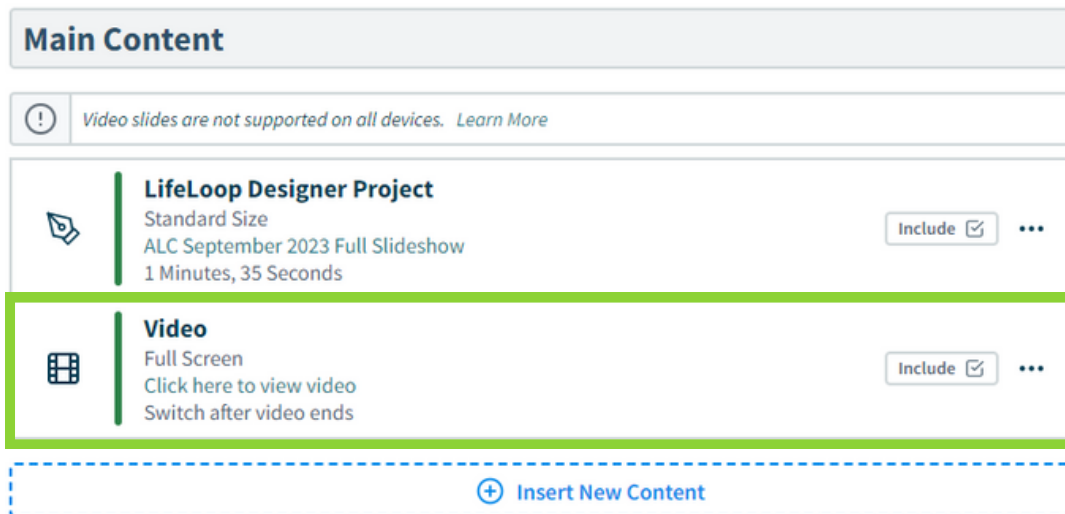

Insert Content

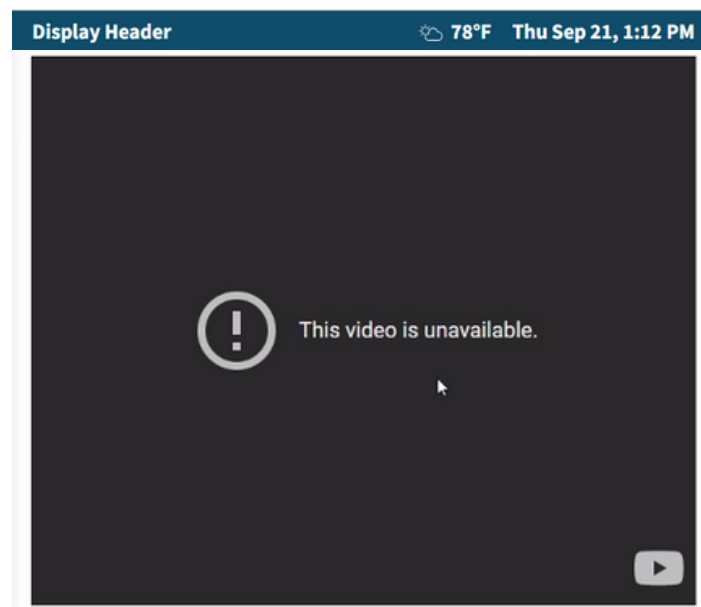

Adding a video to a display

Step 9

The video will appear within the main content list.

Note: If a single video is the only content on the content list, this video will continuously loop. If there is additional content such as other videos or slideshows, the video will play in full, then rotate to the next content on the list and then loop back to the video once all content has been played. If the video is appearing "unavailable" like the image below, please check that the URL is correct and that the video is still active.

Resources

Video QR codes

How to scan QR codes

Open the camera app on a mobile device. Hold the device so the entire QR code is visible in the camera frame (you don't need to take a picture). Once the QR code has been read, a notification will appear at the top of your screen.

How to create a LifeLoop display
