Connect a display to a TV

Step 1

Plug the Fire TV Stick into the TV's HDMI port.

Step 2

Select that HDMI from the TV's source options.

Step 3

Using the remote, go to the Amazon home screen, search "LifeLoop" and hit enter.

Step 4

Select and download the LifeLoop Display App.

Connect a display to a TV

Step 5

Option 1: Web

Open LifeLoop in a web browser and select the display you would like to appear on the TV. Under the connected devices section, manually enter the code provided from the TV screen into the connect code space and select submit.

The image illustrates the process of connecting a display to a TV. It shows a TV screen displaying a QR code and a 'Ready to Connect?' message. The message includes instructions: 'Scan QR Code via the LifeLoop mobile app' and 'Or manually input yuyrf8 via the LifeLoop web or mobile app'. Below the TV screen, a green success message states: 'Success! Your device will begin playing its newly assigned display within minutes.' Below this, the 'Lobby Display' configuration page is shown. It includes a 'Welcome to our Community!' message and a table with settings: Community (Assisted Living Premium), Music (1950s), Theme Color (dark blue), and Linked Calendars (1). A 'Public Url' is listed as 'Not Published'. The 'Connected Devices' section shows a device named 'lukwv7' with the status 'waiting for device to connect'. A green box highlights the 'Connect Code' field and 'Submit' button in the 'Connected Devices' section.

Step 5

Option 2: Mobile

Open LifeLoop on the mobile app. Open the displays feature and choose the display you would like to appear on the TV. Select "connect using QR code". Put the mobile device in front of the QR code to scan the barcode on the TV screen. Bypass the QR code by manually entering the code from the TV into the connect code space provided under connected devices, then select connect.

Most updated version

Note: Each device will need its own Fire TV Stick. If using a Fire TV or Fire TV Cube, the Fire TV Stick is built into the TV and you will not need to purchase a Fire TV Stick.

Displays best practices

Updating slideshows

Anytime changes are made to a LifeLoop designer slideshow project, the slideshow on the display will automatically update. This may take up to 15 minutes to show the update.

Refresh a display

To refresh a display quickly, press any button on the Fire TV Stick remote except power, home, and back. A menu will appear, select **refresh display** to update your display. Refer to the “Refreshing a Display” document on the Learning Community for more information.

LifeLoop Library slideshow templates

To use templates for slideshows, go to **LifeLoop Library** in the designer to select from different slideshow designs.

Note: The Fire TV Stick must stay plugged into a power source. If it is turned off, it will restart and the app will need to be re-opened.

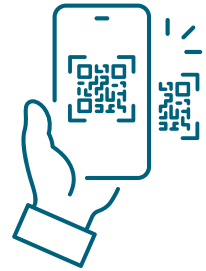

Resources

Video QR codes

How to scan QR codes

Open the camera app on a mobile device. Hold the device so the entire QR code is visible in the camera frame (you don't need to take a picture). Once the QR code has been read, a notification will appear at the top of your screen.
