### THINGS TO NOTE:

- If the new display does not automatically appear on your Televisions using a Firestick, you will have to clear data/cache on the Firestick LifeLoop app and then go back into the LifeLoop app and enter community and display code.
  - To view steps on how to clear data/cache on Firestick, please refer to the document "Clearing Cache from LifeLoop App on amazon Fire TV stick" located in the Learning Community under Displays
- When changing to the new display, the color theme will be converted from your old display Secondary Theme Color.
- Our new display design does **NOT** support Google Slides.
