Section 1:	Samsung Andoid settings.....	1-3
Section 2:	Logging into LifeLoop with biometrics.....	4-5

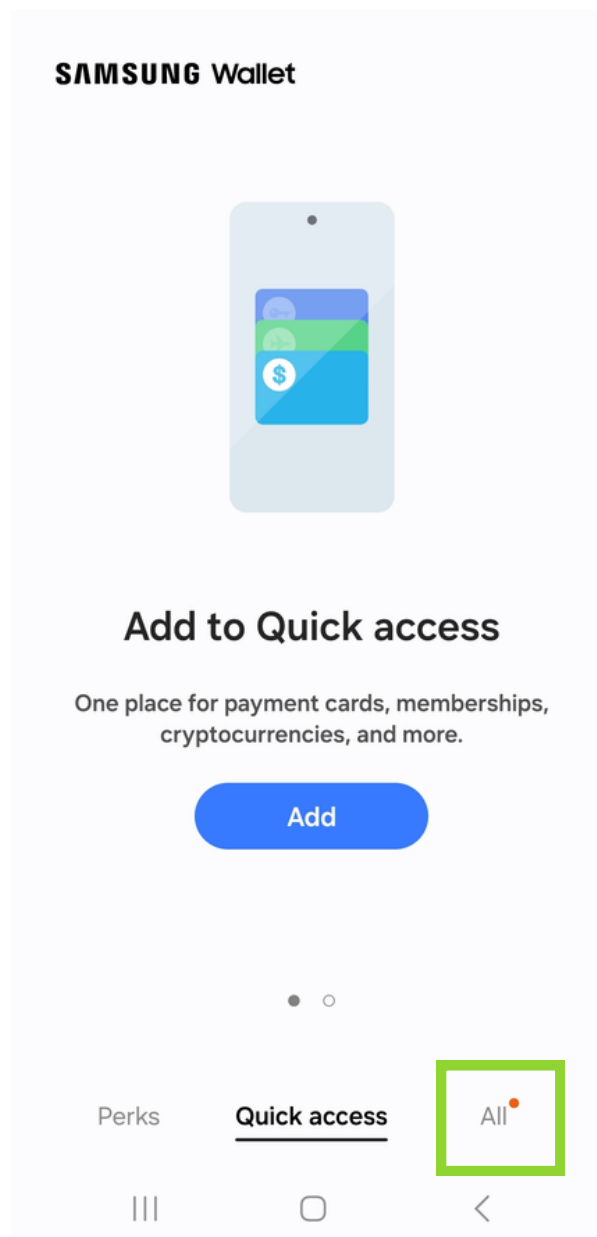

Samsung Andoid settings

Step 1

Open Samsung Wallet.

Step 2

Select **all** at the bottom.

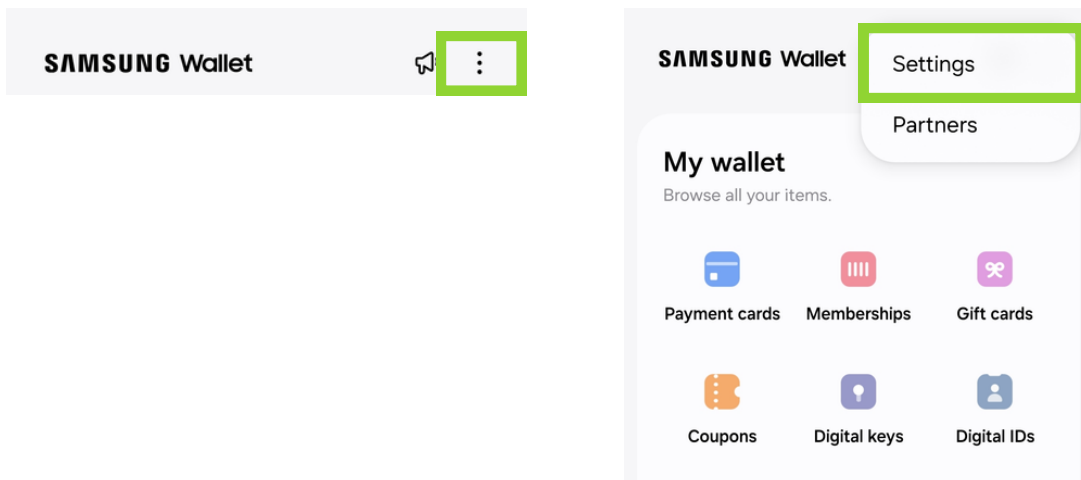

Samsung Andoid settings

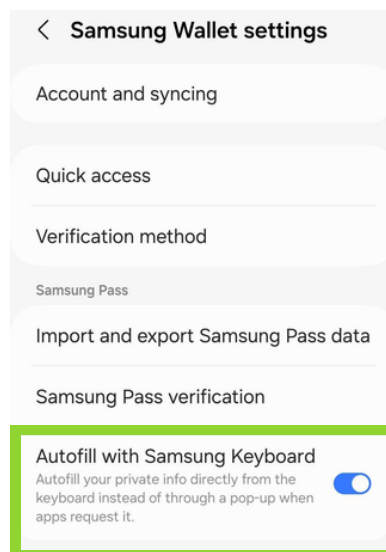

Step 3

Select the 3 dots menu and select settings.

Step 4

Toggle on Autofill with Samsung Keyboard.

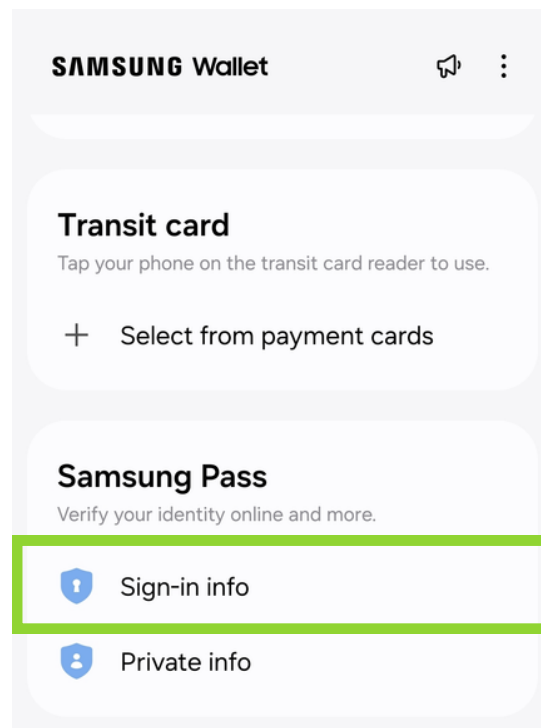

Samsung Andoid settings

Step 5

Select the back arrow < to go back to the previous screen.

Step 6

Scroll down to the bottom of the Samsung wallet settings and select sign in info.

Step 7

Tap on the 3 dots menu ⋮ at the top right, and select excluded apps. Ensure LifeLoop is not listed in the excluded apps. If it is, delete it from the list.

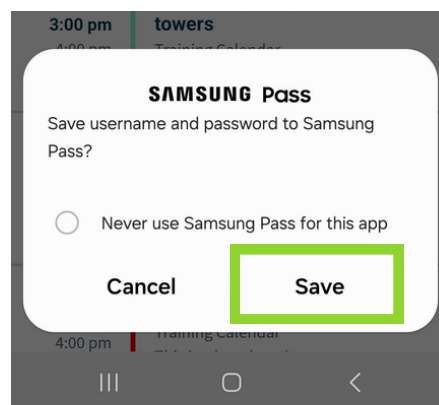

Logging into LifeLoop with biometrics

Step 1

Open the LifeLoop app. If the app has not been downloaded yet, please access the App Store, search LifeLoop and download.

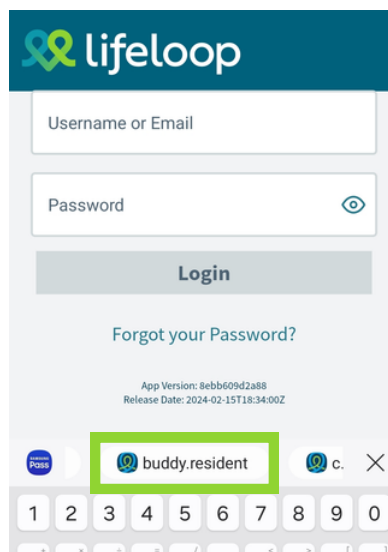

Step 2

The first time logging in on the mobile app, enter username and password and log in. Select **save**.

Step 3

Once the password has been saved, simply tap into the username field for all future logins. The saved password will be available by selecting the saved username below.

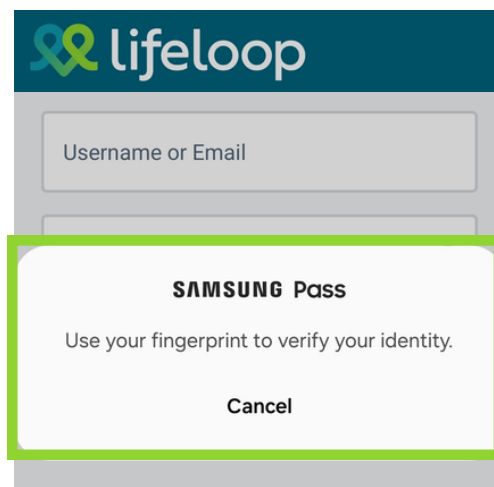

Logging into LifeLoop with biometrics

Step 4

Fingerprint identification will then be enabled to access the password.

Step 5

Once fingerprint access is confirmed the password will appear. Select login.
